twig SCIENCE | Imperial College London

Accelerating Science Literacy with Imperial College London

Discover more about our pioneering partnership

As one of the world's leading universities, Imperial College London has a strong reputation for making groundbreaking discoveries in the technical fields.

Science literacy skills help students understand the scientific concepts and processes that make up the natural world around them, allowing them to explore their own curiosities by asking questions and finding answers to day-to-day phenomena.

In 2014, Twig Science embarked on a collaborative journey with experts at Imperial. With a shared belief in the importance of science literacy and that STEM education should be accessible for all, together we bring the wonders of science to life with innovative digital resources that transform science instruction.
