Courseware | Grades 6–12

imagine edgeEX

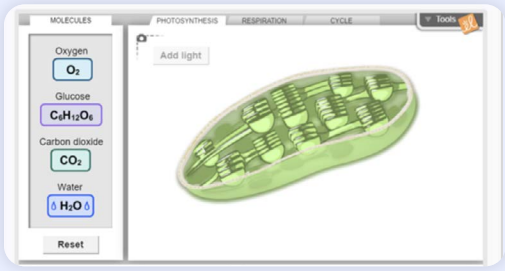

Go Further with Imagine EdgeEX™ Science Courses

Built-in features designed to support comprehension and promote student agency

Imagine EdgeEX's innovative features don't just increase accessibility — they put students in the driver's seat by helping them understand where they're succeeding and where they may need more practice.

Embedded supports help students grasp important concepts

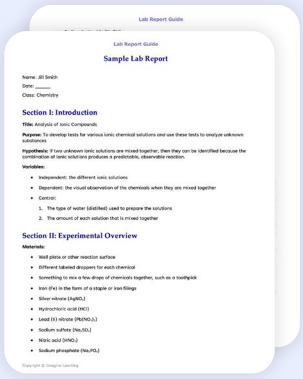

✓ **Virtual Labs:**
All-new Virtual Labs ask students to apply critical science practices, such as inquiry, experimentation, data collection, and design to deepen their understanding of core science concepts.

- Virtual labs

✓ **"How to Write a Lab Report" Guide:**
This guide walks students through how to write each section of an effective lab report, with guidance and examples to support success.

✓ **Fillable Guided Notes:**
Guided notes help students record important information and foster deeper comprehension. Imagine EdgeEX takes it one step further with fillable PDFs, so students can type right into their notes while working through a lesson.

- Sample lab report

Help your students reach their potential with Imagine EdgeEX.
