Introducing Imagine AI for Imagine IM

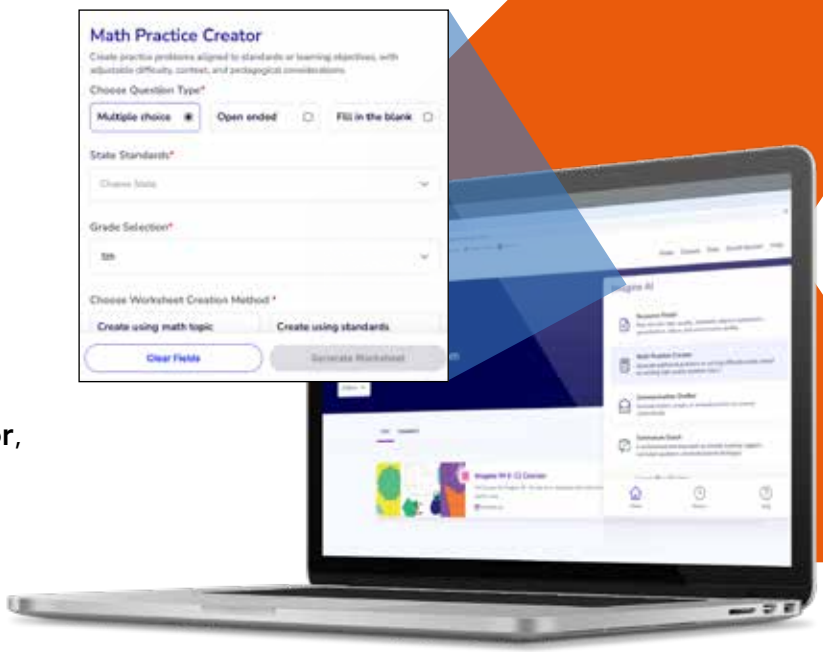

High-quality instructional support built on the curriculum teachers trust.

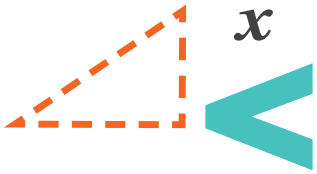

Imagine AI brings curriculum-informed AI directly into Imagine IM. Trained on the Illustrative Mathematics philosophy and the Imagine IM curriculum, it delivers reliable support that helps teachers work smarter while maintaining high-quality instruction.

Instruction You Can Trust

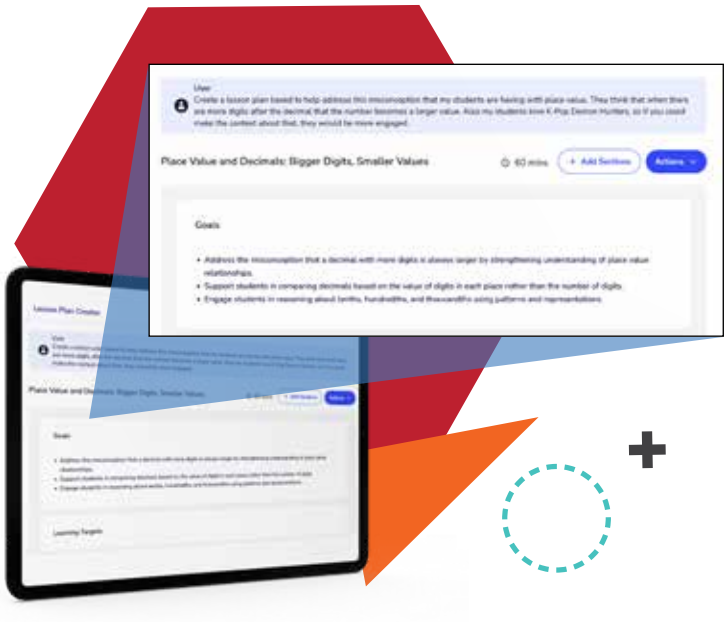

AI grounded in Illustrative Mathematics, not generic content

Imagine AI is built on Imagine IM's curriculum, pacing, and instructional approach. Tools like **Standards-Based Lesson Plan Creator**, **Lesson Plan Creator**, and **Math Practice Creator** generate lessons, problems, and supports aligned to how math is actually taught.

- Math Practice Creator generates problems aligned to the Illustrative Mathematics approach, prioritizing reasoning, sense-making, and student discussion.

Less Busywork. More Teaching.

AI that saves time without compromising instructional quality

Imagine AI streamlines planning by helping teachers quickly find trusted, curriculum-aligned materials through tools like **Resource Finder** and **Lesson Plan Creator**, reducing time spent searching, vetting, and adapting.

- Lesson Plan Creator generates complete, customizable lesson plans aligned to the Imagine IM curriculum, standards, and learning goals, so teachers can go from idea to instruction in minutes.

Built to Support Teacher Expertise

AI designed to assist, not replace, professional judgment

Embedded in Imagine Learning Classroom, Imagine AI tools such as **Curriculum Coach** and **Communication Drafter** support day-to-day decision-making, offering helpful starting points while keeping teachers in control.

- Curriculum Coach offers real-time, curriculum-aligned guidance, helping teachers respond to student needs with confidence.
