Unit Recovery

Keep Students on Track – Before Course Failure Happens

A smarter approach to Unit Recovery

Student in danger of failing a course? Instead of waiting for credit recovery, give students the opportunity to **recover the specific units they missed** and stay on pace toward graduation.

Districts nationwide are increasingly focusing on **early intervention strategies** that help students repair learning gaps **before final grades are posted**—avoiding the complexity of formal credit recovery and keeping students engaged in their current courses.

Imagine Learning provides a powerful solution through **Edgenuity® and EdgeEX™**, designed to help schools implement **standards-aligned unit recovery programs** that work within existing instructional models.

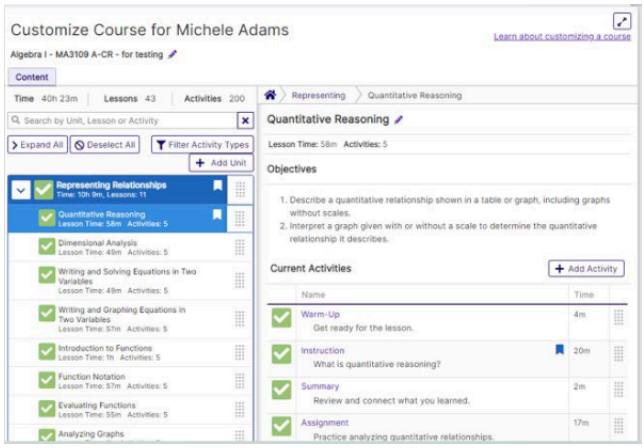

What is Unit Recovery?

Unit Recovery allows students to demonstrate mastery of specific standards or course units they did not initially pass. Instead of repeating an entire course, students:

- ✓ Target the **specific concepts they missed**
- ✓ Receive **personalized remediation and reassessment**
- ✓ Demonstrate mastery aligned to **state standards**
- ✓ Update existing course grades based on new evidence of learning

This approach helps districts:

- 📉 Reduce course failures
- 🎓 Keep students on track for graduation
- 📚 Support mastery-based instruction
- ⏱️ Intervene before credit recovery is required

A Prevention Strategy for Course Failure

- Take action as soon as students fall behind
- Provide structured remediation aligned to standards
- Improve course pass rates
- Reduce reliance on post-failure credit recovery

With the right digital tools, districts can implement **consistent, scalable unit recovery models across schools**.

Why Districts Choose Imagine Edgenuity and Imagine EdgeEX

Imagine Learning provides the **most flexible and scalable platform** for implementing unit recovery programs aligned to district policy.

🎯 **Target Learning Gaps — Not Seat Time:** Standards-aligned assignments ensure students focus **only on the content they haven't mastered**, accelerating recovery and improving outcomes.

📊 **Personalized Learning Pathways:** Built-in diagnostics and prescriptive learning automatically create **individualized pathways** so students receive the support they actually need.

🎓 **Keep Students on Track for Graduation:** **Flexible** unit repair and credit recovery options **help students earn required credits without repeating entire courses.**

🌍 **Designed for Diverse Learners:** Research-based multimedia instruction includes accessibility supports, embedded scaffolding, and multilingual tools. These features help re-engage struggling and at-risk students.

🏫 **Flexible Implementation Models:** Edgenuity and EdgeEX can support **multiple district strategies**, including unit recovery labs, intervention blocks, after-school support, summer learning, alternative education programs, and blended or virtual classrooms.

🔍 **Built-In Accountability:** Real-time dashboards and reporting give educators clear visibility into student engagement, mastery progress, and intervention effectiveness.

📈 **Actionable Data for District Leaders:** Administrators can monitor progress across schools to ensure unit recovery programs are measurable, scalable, and effective**.**

The Imagine Edgenuity and Imagine EdgeEX Difference

Imagine Learning solutions combine:

✓ Standards-aligned digital curriculum
✓ Adaptive learning technology
✓ Instructional integrity tools
✓ Powerful analytics for educators and administrators

Together, **Edgenuity and EdgeEX help districts intervene earlier, repair learning gaps, and keep students on the path to graduation.**
