Connected Assessments Lead to Confident Decisions

Imagine IM® and Imagine Assessment bring instruction and insight together to inform every step of learning

Built-in checks in Imagine IM reveal student thinking during instruction. Imagine Assessment contributes broader visibility into student readiness, growth, and standards mastery. Together, Imagine IM and Imagine Assessment provide multiple measures of student understanding, support instructional decision-making at different time intervals, and enable MTSS-aligned support without disrupting core instruction.

Benchmarks

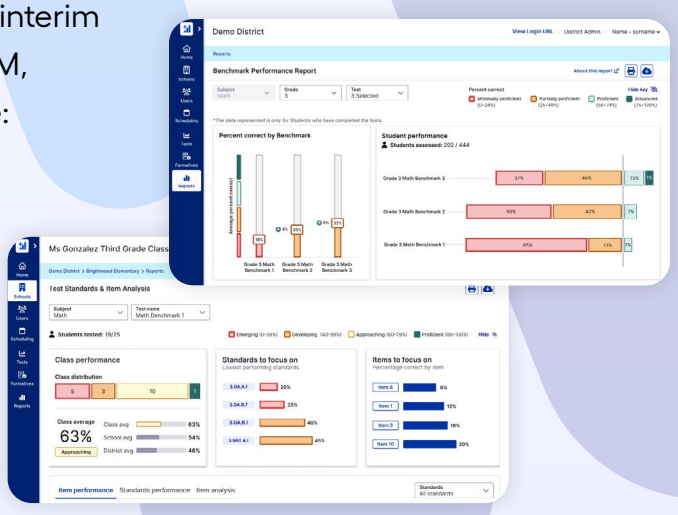

Grades 3–8

Measure

Establish a clear view of proficiency and transfer

Benchmarks are fixed-form, curriculum-aligned interim assessments designed specifically for Imagine IM, providing meaningful checkpoints that measure:

- Standards-level proficiency, not just lesson performance
- Evidence of learning transfer beyond familiar problem types
- Progress toward grade-level expectations
- Comparable results across classrooms and schools

Curriculum-embedded assessments answer:
"Did students learn what was taught?"

Benchmarks answer:
"Are students on track for grade-level proficiency — and can they apply that learning in new contexts?"

Formatives

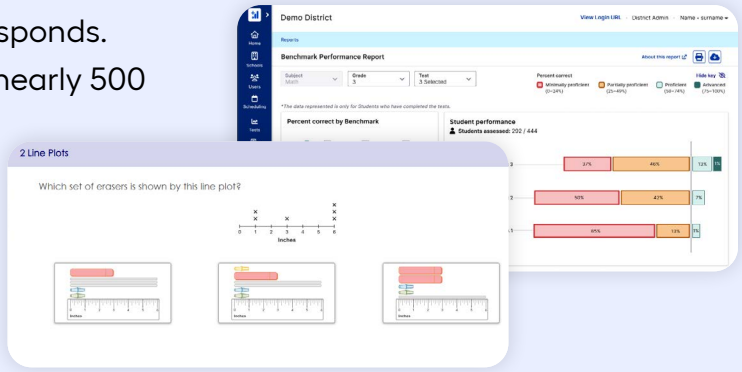

Grades K–12

Validate

Confirm whether instruction improved mastery

Benchmarks identify needs. Instruction responds. Formatives confirm results. Choose from nearly 500 standards-aligned assessments with:

- Technology-enhanced items
- Flexible assignment options
- Standards-organized reporting

Diagnostic

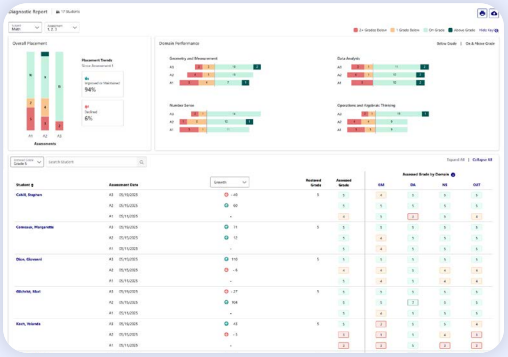

Grades K–12

Grow

Discover where students are starting and how they're progressing over time

Diagnostic shows readiness and long-term growth — not just moment-in-time performance.

- Computer-adaptive, assessed grade-level results
- Insight into readiness gaps
- Domain-level growth measurement
- Nationally normed data, including Quantile® and National Percentile Rankings

Clarity for instruction and leadership

Imagine IM and Imagine Assessment connect classroom learning with system-level visibility.

- Benchmarks show progress toward grade-level expectations
- Formatives confirm the impact of instructional adjustments
- Diagnostic tracks readiness and growth over time

The result: consistent, comparable data leaders can use with confidence.
