Building Stronger Imagine IM Classrooms

Introducing Imagine Learning's partnership with the Modern Classrooms Project

Expanding Professional Learning for Imagine IM

Imagine Learning provides professional learning that supports successful Imagine IM implementation—helping teachers understand the curriculum, lesson structure, and instructional routines.

Our new partnership with **Modern Classrooms Project** equips educators with clear instructional routines and resources that enable mastery-based learning, flexible pacing, and intentional differentiation without sacrificing grade-level rigor.

The Modern Classrooms Project is a nonprofit that trains and supports 3rd-12th grade educators to implement a mastery-based instructional model. The goal of the approach is to strengthen Tier 1 math instruction with high-impact differentiation, while making the teaching profession more sustainable and fulfilling.

How It Works

Imagine Learning Professional Learning

- Curriculum implementation
- Instructional routines and lesson flow
- Supporting strong math instruction

Modern Classrooms Expertise

- Differentiated classroom models
- Small-group instructional practices
- Self-paced learning structures

Learn more about the Modern Classrooms Project at modernclassrooms.org/math

Together, these supports help teachers move from learning the curriculum to running classrooms where it works for every student.

Planning professional learning for next year?
