Family & Caregiver Support Hub

Helping you support your child's math learning at home

Math today focuses on helping kids really understand the "why" behind the numbers so the learning sticks. The Imagine IM Family & Caregiver Support Hub gives you background information plus practical tips and activities you can do together to help your child feel confident in math.

What You'll Find in the Family Support Hub

Videos You Can Follow (K–5)

- Short, friendly videos that explain math concepts and show how your child is learning them in class
- Available in English and Spanish, with captions in 10+ additional languages, so every family can follow along

Activities to Do Together

- Engaging at-home activities that connect math to real life
- Conversation starters and practice ideas to reinforce learning beyond the classroom

Family Guides

- Overviews of what your child is learning in each unit
- Background information to refresh your own math knowledge

All in One Place

- A single online hub with resources organized by grade and unit
- Quick access to everything you need, no searching required

Why You'll Love It

- Feel confident, even if you haven't looked at math in years
- Provides a starting point to talk about math and support learning at home
- Builds stronger connections between home and school

Stay connected to your student's math journey.
