twig SCIENCE

Leads the Way Toward CA NGSS Framework Implementation

Teachers across the state have been telling us why they prefer Twig Science...

"Lots of great learning opportunities that are really engaging and really global. Think about all the world's scientists working together... that's the kind of community-building this program brings together for students. I'm sold!"

"The Twig program was the most engaging program for my young learners. They asked every day if we would be doing Twig Science."

"My students are always engaged in Twig Science. They're becoming real-world science and engineering problem-solvers and that makes STEM careers within their reach."

"Twig Science has taken teaching science to the next level. They have moved away from a traditional textbook-only [approach] to a highly engaging, interactive exploration of NGSS standards."

"My goal is to ignite a passion for learning. My students can't wait to explore Twig Science films and investigations. I use it as a classroom reward that connects across the disciplines."

"Twig Science really pushes students to think critically and deeply, and to learn based on doing, not just seeing or hearing."

"Using Twig Science in the classroom to meet CA NGSS requirements is exciting, inspiring, and revolutionary. Students learn through hands-on exploration of real-world phenomena. My students LOVE Twig Science."
